

INCREASE YOUR P-WIN! WITH OUR ACQUISITION & ASSISTANCE **MOCK TEC**

WIN MORE CONTRACTS & GRANTS!

Utilizing our large network, Pope International assembles a Technical Evaluation Committee (TEC) that is composed of former USAID/USG contracting and technical professionals who evaluate proposals just like the government would, ensuring they meet the federal government's complex requirements. Our mock TECs also provide tips to improve the overall proposal packet.

With our team of experts, Pope International can assist you with all aspects of the proposal process, for both Acquisition and Assistance.

When aiming to secure government contracts and grants with USAID or other agencies, our mock Technical Evaluation Committee (TEC) service is your strategic advantage.

SERVICES

- Mock TEC Review
- Detailed Oral/Written Debriefing
- Flexible Evaluation Schedule
- Technical & Cost Proposal Analysis
- Flexibility In Scope

At Pope International, we coordinate the consultants needed including recruiting, scheduling and managing from start to finish. Our expert team provides detailed feedback and recommendations on the proposal including its alignment with USAID's/the USG's expectations, identifying areas of improvement and our suggestions to make a strong proposal even stronger.

MOCK TEC BENEFITS

Simulating Realistic Evaluations: Our TEC services meticulously mirror the USAID/USG evaluation process, analyzing each offeror's technical (and even cost) proposal against solicitation criteria. With the expertise of former USAID SMEs and relevant consultants, we prepare you thoroughly for the actual evaluation.

Detailed Strengths & Weaknesses Assessment: TEC members score proposals, providing narratives on strengths, weaknesses, and deficiencies, aiding in proposal refinement.

Adherence to Statement of Work (SOW): We assess the ability of offerors to effectively execute the SOW tasks, ensuring alignment between proposals and SOW requirements. If responding to a SOO (statement of objectives), assess the ability to draft response in PWS format.

Agile Implementation Expertise: For Agile-focused proposals, we explore how offerors manage Agile implementation, including release planning, end-user engagement, lessons learned capture, testing processes, team composition, development capabilities, and configuration management strategies.

Assistance with Source Selection Criteria: Our TEC services assist you in addressing all source selection criteria comprehensively. From technical considerations to cost realism, we strive to ensure that your proposal excels in every aspect.
